## Thermo Scientific Heraeus Pico and Fresco

Our **Thermo Scientific Heraeus Pico** and **Fresco** microcentrifuges combine power, versatility and convenience in a safe, compact, easy-to-use lab instrument. Both the ventilated Heraeus® Pico® and the refrigerated Heraeus Fresco® microcentrifuges are designed to accelerate your routine sample preparation processes by providing high speed and generous capacity along with outstanding safety and convenience.

From the intuitive controls, to the innovative Thermo Scientific ClickSeal biocontainment lid, the Heraeus Pico and Fresco microcentrifuges deliver the perfect blend of capabilities to support your micro-volume protocols such as nucleic acid or protein lysate preparation and PCR reaction set up – all in a remarkably small footprint.

## powerful, versatile, easy to use

Available in two speed options, the **Heraeus Pico and Fresco 17 microcentrifuges** are perfect for routine laboratory work, while the **Heraeus Pico and Fresco 21 microcentrifuges** are ideal for high-end research applications, reducing spin times by up to 20%.

Coupled with our extensive rotor selection, **achieve the speed and versatility** you need to carry out complex as well as simple protocols:

- ▶ Our standard rotor runs 24 tubes in a single row with equalized g-forces for reproducibility, from 1.5 to 2.0 mL tubes to mini-preps and spin columns
- ▶ A unique dual row rotor holds 18 x 1.5/2.0 mL and 18x 0.5 mL tubes, eliminating the need for adapters
- ▶ Special high-capacity rotors support 0.5 mL microtubes, 0.2 mL PCR tubes and hematocrit capillary tubes

### Save time by processing samples faster

- ▶ Exceptional acceleration up to 21,100 xg in 12 seconds
- ▶ Refrigerated versions offer cooling in just nine minutes

Unique ClickSeal® biocontainment rotor lid “clicks” in place, providing **assurance that samples are securely contained**, and with one click opening, shortens retrieval time compared to screw-on lids

New PPSU lids have **improved strength and chemical resistance** compared with polycarbonate and metallic lids, and transparency enables viewing for added safety and convenience

**Quiet performance** (<56 dBA ventilated and <50 dBA refrigerated) provides a safe, stress-free environment

**Intuitive controls** and **easy-to-read display** simplifies operation

Highly resistant unit and rotor materials enables vigorous yet **easy cleaning**

Conforms to the latest clinical and safety standards, including **In Vitro Diagnostics (IVD) compliance**

# Pico and Fresco

First in the industry ClickSeal biocontainment lids provide certified, ergonomic, one click rotor opening and closing.

24 spin columns in standard rotor with ClickSeal biocontainment lid

Unique dual row rotor eliminates adapters.
